

Time: 20/2/2024 – 5/3/2024

We have started integrating the backend and frontend parts. We've had a few errors and bugs, but managed to fix them and are making progress.

We've made a start on the website report but have not started to fill it with information.

We also started the video generation code and aim to finish it by the next weekly report.

These 2 weeks, we have mainly been building the 2 websites, fixing code bugs and integrating all of the parts together.

The plan for the next week is to:

- Finish video generation
- Combine front and back ends
- Fill more information to a web report.
