

Time: 12/3/2024 – 19/3/2024

We have finished building the websites, fulfilling most of our initial requirements. We are also now fully done with all of the generation parts and the bugs seem to be fixed.

We have also done a demonstration presentation, outlining the goals, key requirements, project structure, main technologies used and achievements.

Not many updates this week as we have been mainly doing the demonstration video and fixing bugs as they kept occurring.

The plan for the next week is to:

- Deploy the website.
- Adjust some elements of the websites.
- Make the final video.
