

Legal Statement

External Links

Models: The project utilized various external models for script, audio and image generation including [OpenAI Chatgpt-3.5-turbo], [langchain], [ElevenLabs], [IBM Watson Text to Speech], [stability.ai], [Azure]. These models were sourced from reputable providers and are linked accordingly.

Python Libraries: The project relied on several Python libraries for its implementation, such as [moviepy], [textblob], [pydub], [transformers], [nltk], [requests], [numpy], [elevenlabs], [imdb watson], [langchain], [openai]. These libraries are acknowledged and linked for reference.

Security Measures

It is confirmed that although the project requires APIs to be run, it does not involve security tokens, personal API keys, or other sensitive security-facing data. The absence of such elements mitigates security risks and ensures data protection.

License

The source code of AI Podcast is licensed under freeware as discussed with our client.
