

Time: 9/11/2023 – 23/11/2023

- These 2 weeks we have worked on research and identified 2 similar projects, being podcast.ai <https://podcast.ai/> and a youtube channel with simulated Joe Rogan's interviews <https://www.youtube.com/@thejoeroganaixperience>.

That's a quick summary of the features we liked about each:

podcast.ai:

- AI-generated short podcast episodes
- Simple and user-friendly interface
- Topic suggestions by users

Joe Rogan's AI Experience:

- Realistic Conversations
- High quality cloned voices
- Generated pictures of the host and the guest
- Captions
- AI-generated scripts

We will try to implement these features in our podcast, taking the most from each.

The plan for next week is to:

- Complete the MoSCoW requirement list.
- Look closer into technologies and models required for our project.
